## **DETAILED ACTION**

The preliminary amendment has been entered.

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 2424-2449, 2460,2461, 2450, and 2453 drawn to a method of treating a coal formation including controlling the pressure, classified in class 166, subclass 250.07.
  - II. Claims 2424--2449, 2460,2461 and 2459, drawn to a method of treating a coal formation including controlling the heat to yield 60% condensable hydrocarbons, classified in class 166, subclass 302.
  - III. Claims 2424--2449, 2460,2461, 2451, 2452, and 2454-2456, drawn to a method of treating a coal formation including controlling hydrogen pressure, injection hydrogen, or hydrogenating the formation, classified in class 166, subclass 303.
  - IV. Claims 2424–2449, 2460,2461, 2457, and 2458, drawn to a method of treating a coal formation including increasing the permeability, classified in class 166, subclass 305.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

Art Unit: 3673

shown to be separately usable. In the instant case, invention I has separate utility such as without controlling the heat to yield 60%. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as without hydrogenation or hydrogen injection. See MPEP § 806.05(d).

Inventions I and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as without increasing the permeability. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as without hydrogenation or injection of hydrogen. See MPEP § 806.05(d).

Inventions II and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as without increasing permeability. See MPEP § 806.05(d).

Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as without increasing permeability. See MPEP § 806.05(d).

Art Unit: 3673

2. Because these inventions are distinct for the reasons given above and the search required for each of the groups is not required for each of the other groups, restriction for examination purposes as indicated is proper.

3. Claim 2424 link(s) inventions I, II, III and IV. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 2424. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

## Election of Species

4. Claim 2424 is generic to a plurality of disclosed patentably distinct species of heater (embodied in figures 10, 11, 12, 13, 14, 15, 16, 19, 24, 25, 26, 28, and 59) and a plurality of species of wellbore patterns. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of heater and a single disclosed species of wellbore

Art Unit: 3673

pattern (embodied in figures 3; 8; 9; 44-54; 61; and 62), even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Kreck whose telephone number is (703)308-2725. The examiner can normally be reached on 6:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Shackelford can be reached on (703)308-2978. The fax phone numbers for the organization where this application or proceeding is assigned are

Art Unit: 3673

(703)305-3597 for regular communications and (703)305-7687 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)306-4177.
